

Ivan Croce

Dublin, Ireland | ivan.croce.it@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Summary

Junior Full-Stack Developer with practical experience building web applications.

Passionate about continuous learning, problem-solving, and writing clean, efficient code.

Education

EPICODE Institute of Technology - Master in Full-Stack Web Development - Frontend & Backend Sept 2025

A. Righi - High school Diploma in Quantity Surveying, Reggio Calabria, Italy Sept 2011

Skills

Programming: HTML, CSS, Sass, Bootstrap, JavaScript, TypeScript, React, Next.js, Java, Spring Boot, REST API, PostgreSQL

Other: Responsive Design, API Integration, Application Architecture, Agile Collaboration

Experience

Customer Service Representative - INPS Project, Covalen for Citi - Dublin, IE May 2024 - Jan 2025

- Assisted pension holders and agencies (INPS, Patronati) with payment guidance and related processes.
- Handled inquiries on missing payments, proof of life procedures, and international transactions.
- Processed updates to personal data, payment preferences, and customer addresses.
- Maintained communication with stakeholders to ensure smooth coordination and timely resolution.

Assistant Manager / Head Chef, Bianco's Restaurant - Malta, MT Oct 2014 - Apr 2023

- Led and trained a kitchen team, optimizing workflow and performance to ensure consistent, high-quality service.
- Supported management in daily operations, scheduling, and inventory tracking to improve efficiency.
- Coordinated events and cross-team communication to enhance customer experience and satisfaction.
- Delivered excellent customer service and built lasting client relationships.
- Managed social media presence to increase engagement and visibility.

Projects

Halo Health - Frontend Website (Next.js, TypeScript) [Halo Health](#)

- Refactored and completed a health & wellness website, improving code structure and performance.
- Optimized performance, raising Lighthouse scores from ~80-85 to 95-100 on mobile and desktop.
- Reduced FCP, LCP, and Speed Index to all-green values through code refactoring and asset optimization.
- Improved Accessibility, Best Practice and SEO for a faster, user-friendly experience.

EduAtlas Affinity Report System - Full-Stack Web Application [Live Demo](#) | [GitHub](#)

- Designed and developed a degree comparison web app using React (Vite), Sass, Bootstrap, Java (Spring Boot), and PostgreSQL for Westcliff University.
- Engineered a custom Java data parser (Apache POI) to normalize complex Excel matrices into the database.
- Implemented a secure Admin Backoffice with JWT Authentication and Role-Based Access Control (RBAC) for data management.
- Managed the full development lifecycle independently, deploying the live application to Netlify and Koyeb.

Epic Energy - Full-Stack Web Application [GitHub](#)

- Led a 5-day build week project, managing a small team to deliver a functional full-stack web application on time.
- Developed the backend API and database for authentication, user management, and core functionality.
- Implemented a minimal frontend (login and dashboard) and integrated it with the backend.
- Coordinated team workflow, assigned tasks, and ensured smooth collaboration and delivery under tight deadlines.
