

Ivan Croce

Dublin, IE | ivan.croce.it@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Summary

Junior Full-Stack Developer with hands-on experience delivering and optimizing production web applications. Focused on writing clean, scalable code and performant solutions using React, TypeScript, and Java with Spring Boot.

Skills

Tech Stack: React, JavaScript, TypeScript, Next.js, Java, Spring Boot, PostgreSQL, HTML, CSS, Sass, Bootstrap

Other: Application Architecture, API Integration, Performance Optimization, Responsive Design, Agile Development

Experience

Freelance Frontend Developer (Remote) - [Halo Health](#), Dublin, IE Aug 2025 - Feb 2026

- Refactored a multidisciplinary health and wellness website using Next.js 15 (App Router) and TypeScript, optimizing internationalization (i18n) logic and dynamic routing.
- Enhanced the UX/UI by implementing fluid GSAP animations, while significantly improving codebase architecture and mobile responsiveness.
- Optimized Core Web Vitals, reducing Speed Index by 70% (8.1s to 2.4s), LCP by 39% (4.1s to 2.5s), and FCP by 44% (2.7s to 1.5s).
- Achieved 95+ PageSpeed scores by optimizing assets, image delivery, accessibility, best practices, and SEO.

Customer Service Representative - INPS Project (Hybrid), Covalen for Citi - Dublin, IE May 2024 - Jan 2025

- Assisted agencies and pension holders with payment guidance, missing transactions, and proof of life procedures.
- Managed personal data updates and maintained communication for timely resolutions.

Assistant Manager / Head Chef, Bianco's Restaurant - Malta, MT Oct 2014 - Apr 2023

- Led and trained cross-functional teams over an 8-year tenure, optimizing workflows in high-pressure environments.
- Managed daily operations and inventory while coordinating large-scale events.
- Oversaw client relations and social media presence, driving brand visibility and customer engagement.

Projects

EduAtlas Affinity Report System - React(Vite), Sass, Bootstrap, Java, Spring Boot, PostgreSQL [Live](#) | [GitHub](#)

- Designed and developed a degree comparison web app to generate affinity scores and downloadable PDF reports for EduAtlas & Westcliff University.
- Engineered a custom Java data parser (Apache POI) to normalize complex Excel matrices into the database.
- Built a secure Admin Backoffice with JWT authentication and RBAC, documented REST APIs with Swagger UI and validated endpoints with Postman.

Epic Energy - React(Vite), Bootstrap, Java, Spring Boot, PostgreSQL [GitHub](#)

- Led a 5-day Agile sprint to deliver a B2B CRM MVP and normalize thousands of municipality records.
- Built advanced search functionality using Spring Data JPA Specifications to filter complex client and invoice datasets.
- Implemented JWT Authentication and developed a React dashboard for secure end-to-end integration.

Event Management Platform - Java, Spring Boot, PostgreSQL [GitHub](#)

- Developed a secure Event Management REST API using Spring Boot with JWT authentication and RBAC.
- Engineered seat booking logic with robust server-side validation and exception handling.

Education

EPICODE Institute of Technology - Master in Full-Stack Web Development - Frontend & Backend Sept 2025

A. Righi - High school Diploma in Quantity Surveying, Reggio Calabria, Italy Sept 2011
